EDUCATION

Macalester College

St. Paul, MN

Bachelor of Arts in Computer Science and Linguistics, Minor in Spanish, GPA: 3.92

Sept. 2023 – May 2027

- *Study Abroad, The University of Edinburgh* (Jan. – May 2026)
- *Relevant Coursework: Foundations of Natural Language Processing, Object-Oriented Programming, Data Structures, Algorithms, Software Design and Development, Computer Systems (Fall 2026), CodePath's Intro to IOS Dev and Intermediate Web Dev*

TECHNICAL SKILLS

Languages: Python, Java, C, HTML/CSS, JavaScript, TypeScript, SQL, R, Swift, C#, Vue 2

Frameworks: React, Next.js, FastAPI, Node.js, Tailwind CSS, Bootstrap, Material-UI, Unity

Developer Tools: Git, PostgreSQL, Firebase, Supabase, Clerk, Vercel, Google Cloud Platform, Convex, Figma, Vite

APIs & Libraries: Anthropic API, OpenAI API, Stripe, Pinecone, HuggingFace, Pydantic, RESTful APIs

EXPERIENCE

Founder – demystify.org

May 2026 – Present

MacStartups Fellow

Twin Cities, MN

- Founded and built a full-stack tax-literacy platform in Next.js, React, and JavaScript for Somali-speaking immigrants in the Twin Cities, securing funding through the competitive MacStartups fellowship program.
- Architected a single-call vision extraction pipeline using Claude Opus to classify and extract fields from multi-document uploads (PDF, JPG, PNG, HEIC) across 23 IRS form types and 181+ fields, including in-memory HEIC conversion with no file persistence.
- Designed a bilingual Somali/English annotation system across 22 keyed JSON libraries with a human-review workflow, surfacing field-level explanations through an interactive popover UI built with Tailwind CSS.
- Built a scope-constrained chatbot in Next.js using Claude Sonnet with a sliding 20-message window and prompt-caching architecture, answering tax-term and document questions in Somali or English while declining out-of-scope prompts

Front-End Developer Intern

May 2025 – Dec. 2025

Gobo Show, Inc.

Minneapolis, MN

- Improved page performance as measured by a 30% reduction in load times, by migrating the Events page from Vue 2 to Next.js with server-side rendering using TypeScript and Tailwind CSS for UI.
- Streamlined artist onboarding with approximately a 25% improvement by building anonymous authentication, account conversion, and invitation-based signup flows in React and Firebase, including profile pre-fill from Firestore.

Software Engineering Fellow

July 2024 – Sept. 2024

Headstarter AI

Remote

- Delivered a portfolio of AI-integrated applications as measured by 5+ projects shipped in 5 weeks, by building full-stack apps in React/Next.js/Firebase with OpenAI, Pinecone, and Stripe API integrations under CI/CD practices.
- Reduced team development time as measured by a 15% efficiency gain, by leading 4 engineering fellows through MVC-pattern architecture decisions from design to deployment.

PROJECTS

LingoHub | *React, Next.js, JavaScript, Supabase, PostgreSQL, Jest*

Aug. 2025

- Built a full-stack social platform for language learners with authentication, real-time post creation, comments, upvotes, and saved-post collections, migrating from Firebase to Supabase for SQL-backed data management.
- Implemented advanced filtering, sorting, and a user profile system to improve content discoverability and community engagement.

Social Network Visualizer | *Java, PageRank Algorithm, Data Structures, Graph Theory*

Dec. 2024

- Built a weighted graph model in Java using HashMap-based adjacency lists, parsing CSV user data to compute relationship strengths based on shared attributes like age or nationality.
- Implemented PageRank to quantify user influence within the network, producing ranked leaderboards of the top 5 most connected users with an interactive visualization layer.
