Education

Macalester College

St. Paul, MN

B.A. in Computer Science and Linguistics, Minor in Spanish, GPA: 3.92/4.00

Sept. 2023 – May 2027

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Software Design and Development, Computer Systems, Introduction to Artificial Intelligence, Foundations of NLP, CodePath iOS and Web Development

Honors and Awards: Dean's List, Davis Scholar, Kofi Annan Scholar, MacStartups Fellow, Inclusive Coding Festival Selectee

Organizations: Macalester Women's Soccer, ColorStack, Rewriting The Code, Girls Who Code, CodePath, GameDevs at Mac

Work Experience

Software Engineer

May 2026 – Aug. 2026

Demystify.org

Twin Cities, MN

- Founded a tax-literacy platform for Somali speakers using **Next.js** and **React**, validated through **5 user-testing sessions** and feedback from **20+** community members within 10 weeks.
- Architected a single-call Claude vision pipeline that classifies and extracts **181+** fields across **23** IRS form types from PDF, JPG, PNG, and HEIC uploads with no file persistence for user privacy.
- Developed a bilingual Somali/English Claude chatbot with scope controls, cutting API costs by **~40%** through prompt caching and a sliding 20-message window.

Software Engineer Intern

May 2025 – Dec. 2025

Gobo Show, Inc.

Minneapolis, MN

- Reduced Events page load times by **30%** for an event-ticketing platform serving independent artists and venues by migrating the application from **Vue 2** to **Next.js** with server-side rendering, **TypeScript**, and **Tailwind CSS**.
- Increased artist onboarding completion by **~25%** by streamlining account creation with anonymous authentication, invitation-based signup, account conversion, and Firestore profile pre-fill using **React** and **Firebase**.

Software Engineering Fellow

July 2024 – Sept. 2024

Headstarter AI

Remote

- Shipped 5 production-ready full-stack **AI applications** in 5 weeks using **React**, **Next.js**, and Firebase with **OpenAI**, **Pinecone**, and **Stripe** integrations under **CI/CD** practices, reaching **200+** users.
- Led 4 engineering fellows through **MVC-pattern** architecture decisions from design to deployment, reducing PR cycle time by **~15%**, through structured code reviews and clear ownership boundaries.

Projects

Lock The Code | lockthecode.net | *Next.js, TypeScript, FastAPI, PostgreSQL, Python, Anthropic API*

- Engineered a full-stack interview-prep SaaS with **Next.js**, **TypeScript**, **FastAPI** and **PostgreSQL** using SM-2 spaced repetition, onboarding **70+** users including 1 paying customer within 2 weeks of launch.
- Integrated Clerk authentication, Stripe billing with **idempotent webhooks**; built a streaming AI tutor/mock interviewer using **Anthropic API** and achieved **97%** email deliverability via Resend for daily practice reminders.
- Built a **15-test pytest integration suite** achieving **100%** endpoint coverage across highest-risk **REST API** workflows, automated via **GitHub Actions CI** and **Docker Compose** for reproducible local development.

LingoHub | <https://lingo-hub.vercel.app/> | *React, Next.js, JavaScript, Supabase, PostgreSQL, Jest*

- Migrated a full-stack forum for language learners from **Firebase** to **Supabase** to support relational **SQL** queries, enabling real-time posts, comments, upvotes, and saved collections for **35+** active users.
- Established a testing foundation with **Jest** and **React Testing Library**, writing tests across post rendering, navigation, and auth state flows to catch regressions early in the development cycle.

Social Network Visualizer | [GitHub](#) | *Java, PageRank, Graph Theory, Data Structures*

- Built a weighted **Java** graph using HashMap adjacency lists and **CSV** data to model relationships from shared attributes.
- Implemented Google's **PageRank algorithm** to rank influence and generate a top-5 leaderboard with an interactive graph.

Technical Skills

Languages: Python, Java, C, TypeScript, JavaScript, SQL, HTML, CSS, Swift

Frameworks: React, Next.js, Node.js, FastAPI, Tailwind CSS, Bootstrap, Material-UI

Cloud & Tools: Git, GitHub Actions, Docker, Vercel, Railway, GCP, Cloudflare, Clerk, PostHog, Figma, Vite, Linux

AI/ML & APIs: PyTorch, NumPy, Hugging Face, Anthropic API, OpenAI API, Pinecone, REST APIs, Google Cloud APIs
